

Weekly COVID-19 Update – April 9, 2021: Average Daily Cases Decrease; Current Hospitalizations Continue Upward Trend

DOVER (April 9, 2021) – The Delaware Division of Public Health (DPH) is providing an update on the most recent statistics related to coronavirus disease 2019 (COVID-19) in Delaware, as of 6 p.m. Thursday, April 8, 2021.

A total of 97,784 positive cases of COVID-19 among Delaware residents have been reported to DPH since March 18, 2020. The seven-day average of new positive cases decreased to 314 as of Thursday, April 8.

The seven-day average for the percentage of persons who tested positive for COVID-19 as of Thursday, April 8, was 23.1%, a decrease from 23.4% as of Thursday, April 1. DPH publishes both positivity rates – persons tested and total tests conducted – on its COVID-19 data portal. As of Tuesday, April 6, the seven-day average for the percentage of total tests that were positive was 5.3%, a decrease from 5.5% as of Tuesday, March 30. There is a two-day lag for presenting data related to percent of tests that are positive to account for the time delay between the date of the test and the date that DPH receives the test result.

In addition, 154 individuals are currently hospitalized due to COVID-19 in Delaware, which is an increase of 13 as of this time last week. Twenty-one of the hospitalized persons are critically ill, up thirteen from last week.

A total of 1,573 Delawareans have passed away due to

complications from COVID-19. The state reported 8 additional deaths since last week's update. The total number of individuals who have died from COVID-19 range in age from younger than 5 to 104 years old. Of those who have died, 790 were female and 783 were male. A total of 783 individuals were from New Castle County, 325 were from Kent County, and 465 were from Sussex County.

Update on COVID-19 Variant Cases in Delaware:

To date, the Division of Public Health has identified the following COVID-19 variants in Delaware through routine surveillance of test specimens. These variants are based on the Centers for Disease Control and Prevention (CDC) list of Variants of Concern and Variants of Interest.

A table of Variants of concern and interest.

In aggregate, the cases include 120 adults ranging in age from 18-98, as well as 23 individuals under the age of 18. Ninety-eight individuals were from New Castle County, 26 were from Kent County and 19 were from Sussex County. The county of residence is currently unknown for two individuals.

The Delaware Public Health Laboratory has sequenced 1,426 specimens for COVID-19 variant strains to date, including 89 within the past week.

Virus mutation is common. Public health approach and treatments are currently not any different, but as these variants may be more contagious, it is even more important that individuals remain vigilant and continue taking the necessary steps to avoid spreading the virus – wear a mask, wash your hands, avoid gatherings.

For more information regarding CDC variant classifications, visit

<https://www.cdc.gov/coronavirus/2019-ncov/cases-updates/variant-surveillance/variant-info.html>.

COVID-19 Vaccinations:

Due to a reduced supply of Johnson & Johnson vaccine expected to be delivered to the state over the next three weeks, along with the need to accommodate second doses for persons vaccinated at state-run events, DPH is now expecting to have fewer large vaccination events over the next few weeks than had been previously planned. Those signed up on the state waiting list may have to wait longer for an appointment. The state will increase access to first-dose appointments as soon as the supply increases again.

As of 12:01 a.m. April 9, a total of 544,615 administered doses of the COVID-19 vaccine have been reported to the state's immunization information system, DelVAX. A total of 536,600 doses have been delivered to the state, and 143,575 doses have been delivered as part of the federal provider programs. Delaware's latest COVID-19 vaccination statistics can be found under the Vaccine Tracker dashboard at de.gov/healthycommunity. For the latest information on the COVID-19 vaccine and the vaccination rollout in Delaware, visit de.gov/covidvaccine.

Long-term Care Statistics:

As of 6:00 p.m. Thursday, April 8, there have been a total of 2,697 positive COVID-19 cases involving long-term care residents, and 733 residents of Delaware long-term care facilities have died from complications related to COVID-19.

The locations and number of deaths involving residents of long-term care facilities are:

- Atlantic Shores Rehabilitation and Health Center, Millsboro (24)
- Brackenville Center, Genesis Healthcare, Hockessin (23)

- Brandywine Nursing and Rehabilitation Center, Wilmington (37)
- Brandywine Living at Seaside Pointe, Rehoboth Beach (5)
- Brookdale Dover, Dover (15)
- Cadia Healthcare Broadmeadow, Middletown (17)
- Cadia Healthcare Capitol, Dover (21)
- Cadia Healthcare Renaissance, Millsboro (12)
- Cadia Healthcare North Wilmington/Silverside, Wilmington (33)
- Cadia Healthcare Pike Creek, Pike Creek (3)
- Churchman Village, Newark (21)
- Country Rest Home, Greenwood (16)
- Delaware Hospital for the Chronically Ill, Smyrna (15)
- Delmar Nursing and Rehabilitation Center in Delmar (2)
- Dover Place, Dover (7)
- Foulk Manor South, Wilmington (15)
- Forwood Manor, Wilmington (9)
- Governor Bacon Health Center, Delaware City (1)
- HarborChase of Wilmington, Wilmington (4)
- Harbor Healthcare and Rehabilitation, Lewes (46)
- Harrison House Senior Living, Georgetown (48)
- Hillside Center, Wilmington (9)
- Ingleside Assisted Living, Wilmington (4)
- Kentmere Rehabilitation and Healthcare Center, Wilmington (9)
- Kutz Senior Living, Wilmington (10)
- Little Sisters of the Poor, Newark (11)
- Lofland Park Center, Genesis Healthcare, Seaford (6)
- ManorCare Health Services, Wilmington (20)

- Westminster Village, Dover (23)
- WillowBrooke Court Skilled Center at Manor House, Seaford (12)
- WillowBrooke Court at Cokesbury Village, Hockessin (4)
- Four other New Castle County long-term care facilities (1 death at each facility)
- One other Sussex County long-term care facility (1 death at this facility)

If you are sick with any of the following symptoms, stay home: fever, cough, shortness of breath, sore throat, muscle aches, fatigue, chills, shaking with chills, loss of smell or taste, nausea or vomiting, diarrhea, or headache or congestion or runny nose without a known cause such as allergies. Other symptoms such as abdominal pain or lack of appetite have been identified as potential symptoms related to COVID-19 and may prompt further screening, action or investigation by a primary care provider. If you are sick and need essential supplies, ask someone else to go to the grocery store or the pharmacy to get what you need.

DPH reminds Delawareans that if you believe you have been exposed to someone with COVID-19, or have symptoms of illness,

make sure to distance yourself from others, particularly vulnerable populations. Older adults and people of any age with serious underlying medical conditions – including serious heart conditions, chronic lung conditions, including moderate to severe asthma, severe obesity and those who are immunocompromised, including through cancer treatment – may have a higher risk for severe illness from COVID-19.

Information about testing events, including community testing sites, permanent fixed testing sites, and free-standing sites operated by the health care systems and hospitals, will be listed on the testing section of the Delaware coronavirus website at de.gov/gettested.

Delawareans 18 or older are encouraged to download COVID Alert DE, Delaware's free exposure notification app to help protect your neighbors while ensuring your privacy. Download on the App Store or Google Play.

Individuals with general questions about COVID-19 should call Delaware 2-1-1, individuals who are deaf or hard of hearing can text their ZIP code to 898-211, or email delaware211@uwde.org. Hours of operation are 8:00 a.m. to 9:00 p.m. Monday through Friday; 9:00 a.m. to 5:00 p.m. Saturday and Sunday. Medically related questions regarding testing, symptoms, and health-related guidance can be submitted by email at DPHCall@delaware.gov.

Individuals who have complaints about individuals violating public gathering restrictions should contact state or local law enforcement. Concerns that a business may be violating operating restrictions should be directed to: HSPContact@delaware.gov. Questions related to business re-openings or operations as businesses re-open should go to COVID19FAQ@delaware.gov. Questions regarding unemployment claims should be emailed to: UIClaims@delaware.gov.

As a reminder, DPH recently announced it has created a pathway

for the public to submit complaints if they believe a COVID-19 vaccination provider is violating vaccination requirements. Those complaints can be directed to HSPContact@delaware.gov.

DPH will continue to update the public as more information becomes available. For the latest on Delaware's response, go to de.gov/coronavirus.
